

# MULTI-BAG WATER FILTRATION UNITS

## For Removal of Suspended Solids from Wastewater

TIGG offers Multi-Bag Water Filtration Units with either 6 or 12 bag cavities. The filtration units are constructed of 304 stainless steel and provide reliable and efficient performance in removing suspended solids and gelatinous particles from liquid streams.

Both the 6 and 12 bag units feature Buna seals and heavy-duty swing bolt closures. The equipment operates at up to 150 PSI and 250 ° F.

The individual filtration bags are made of polyester, nomex and PTFE and are available in sizes 0.5 to 200 microns. These units are available for both sale and rental.

Multi-Bag Filtration Units						
Model #	Cavities	Flow Rate	Pipe Size	Filter Area	Diameter	Height
BFH-6	6	1050	6"	26.4	26"	68"
BFH-12	12	2100	8"	44.0	36"	79"
