## TIGG KLS

Ammonia & Sulfur Odor Removal Media

### DESCRIPTION

TIGG KLS is a natural occurring product that has ion exchange properties which make it well suited for adsorbing ammonia and sulfur odors. It exhibits a high resistance to extreme temperatures and its basic structure is chemically neutral.

TYPICAL PROPERTIES	TIGG KLS
U.S Sieve, 90 wt% min	4 x 8
Apparent Density, (dense packing)	
lbs/ft <sup>3</sup>	53 - 57
Moisture – wt% max (as packaged)	15
Ammonia Capacity, % loading	3 - 6

### TYPICAL APPLICATIONS

TIGG KLS is used as an odor control agent and water purification media. Its main use is in adsorbing ammonia and sulfur related odors and in ion exchange liquid applications.

Standard Packaging is in 2000 pound supersacks.
