## **TIGG LLC AWARDED CONTRACT FOR TREATMENT OF PFOA/PFOS WITH THE CITY OF MARTINSBURG**

**FOR IMMEDIATE RELEASE**

**OAKDALE, Pa. — (May 8, 2017) —** TIGG, LLC has been awarded the contract with the City of Martinsburg, WV for treatment of PFOA and PFOS chemicals at the Big Springs Water Filtration Plant.

PFOA is a chemical found in firefighting foam and used by many Air Force and National Guard bases to fight fires. The EPA has established health advisories for these chemicals that have been found in drinking water.

TIGG will deliver the first of two 12' diameter GAC (Granular Activated Carbon) adsorber systems in early July of 2017. The second system will be delivered in early fall to meet the treatment objectives. The system, when complete, will treat up to 2.9 million gallons of water per day.

Since 1977 TIGG has provided a broad range of activated carbon adsorption equipment, systems, filtration media, and services for the removal of trace contaminants from air, water, process liquids, and vapors. Headquartered in Oakdale, Pennsylvania, TIGG builds standard and custom equipment at its 155,000 square foot manufacturing facility in Heber Springs, Arkansas.

TIGG is a wholly owned subsidiary of the Spencer Turbine Company, which is recognized as a global leader in the design, engineering, and manufacturing of highly specialized blowers, gas boosters, and central vacuum systems.
