TIGG PROVIDING ADDITIONAL GRANULAR ACTIVATED CARBON (GAC) VESSELS TO THE CITY OF WEST MONROE, LOUISIANA

FOR IMMEDIATE RELEASE

OAKDALE, Pa. — (November 3, 2017) — TIGG has provided an additional GAC System to the City of West Monroe, Louisiana. It is identical to the previous system installed in 2014 to treat their water for color, taste, odor and disinfection byproducts.

The system includes four GAC vessels containing 20,000 pounds of carbon in each and is a part of TIGG's standard product line. The liquid phase collection system is designed to promote even flow distribution and thus, efficient adsorbent utilization.

TIGG's Business Development Manager, Karl Kuchling stated, "The installation was seamless and all the heavy equipment was set in place in less than five hours". The project will be completed in the first quarter of 2018.

About TIGG LLC

Since 1977, TIGG has provided a broad range of activated carbon adsorption equipment, systems, filtration media, and services for the removal of trace contaminants from air, water, process liquids, and gasses. The company is based at its corporate headquarters in Oakdale, Pennsylvania and it operates a 155,000-square foot manufacturing facility in Heber Springs, Arkansas.
